QUALITY & VALUE
TRUST & SUPPORT

Excellent Research and Development Plus Modern Equipment are Key Factors to Ensure Premium Quality Products That Meet ABRO’s High Standards.
WELCOME

For over three quarters of a century, ABRO has consistently stood for quality and value. During the past 79 years, it has been ABRO’s commitment to our distributors and the people who use our products that has fueled ABRO’s growth. As we look to the future, we will never forget the foundation on which our success is built.

At the heart of ABRO is our World Headquarters located in South Bend, Indiana, U.S.A. It brings together our dedicated sales managers with logistics experts in order to ensure that the right product mix arrives when and where it is needed.

Our sales managers are supported by highly professional accountants, designers and brand protectors. Each member of ABRO’s dedicated staff works together seamlessly to allow ABRO to compete, and win, against the biggest companies in the world.

Certainly the most important part of ABRO is our worldwide team of dedicated and energetic distributors. Located throughout the world, ABRO distributors are independent entrepreneurs who have joined together to form one of the most powerful distribution systems in the industry.

Not content, like many of our competitors, to only distribute in a few easy to access locations, ABRO reaches into over 185 countries and territories around the globe. Wherever there is a market to be served, you can be sure that ABRO has a partner working hard, day and night, to serve it.

ABRO distributors range from long established companies who hold a commanding position in their home countries, to new and energetic startups that consist of little more than a single person’s dreams and determination. Each distributor carries with them the collective experience of the ABRO family; and each is entrusted to protect the reputation for reliability of the ABRO name. To this end, we make sure that each distributor receives exactly the type and amount of support they need in order to continue to grow ABRO into the successful brand it is today.

As ABRO enters our eighth decade of business, we recommit to protecting the values that brought us to this point. We pledge to expand our horizons to ensure that we continue to serve our partners and customers well. Not holding to the past, but not forgetting it either, ABRO prepares to reach even greater heights and to enrich its family of distributors even more.

Now, more than ever, ABRO is....

A TRUSTED NAME WORLDWIDE®

In 2014, ABRO celebrated 75 years of serving the world.

PRESIDENT’S AWARDS
ABRO received the E-Award in 1991 and the E-Star Award in 2005. The President’s E-Star Award recognizes continued superior performance in increasing or promoting exports. Only recipients of the E-Award are eligible and the level of performance must exceed that for which the E-Award was given.

ABRO’s Grease Products Provide Excellent Lubrication for Automotive, Industrial, Agricultural and Household Applications.
#2 SUPER RED LITHIUM GREASE
Contains Extreme Pressure Additives for Severe Operating Conditions, Excellent Performance in Temperature Extremes
PART NO. LG-921
Cartridge 25/CASE
PART NO. LG-920
16 OZ./454g 12/CASE

#2 HEAVY-DUTY LITHIUM GREASE
Lubricates Chassis Points, Wheel Bearings and Ball Joints
Reduces Friction and Premature Wear
Protects Against Rust and Corrosion
PART NO. LG-857
16 OZ./454g 12/CASE

#2 SUPER BLUE LITHIUM GREASE
Delivers Longer Lasting Performance and Protection
Suitable for Damp Conditions and Marine Applications
PART NO. LG-935

LUBRICANTS

ABRO is Meeting the Latest Requirements and Energy Efficiency Regulations in the Industry.
To serve ABRO’s distributors best with various needs, we have equipped ourselves with a wide range of lubricant filling machines to ensure that we are able to fulfill the needs in various bottle and packaging sizes.

**API Approved Motor Oils**

API approved Motor Oils are suitable for gasoline and diesel powered vehicles. Motor Oils displaying these marks meet performance requirements set by the U.S. and international vehicle and engine manufacturers and lubricant industry.

API Approved Motor Oil is designed to provide high temperature deposit protection for pistons and turbochargers, more stringent sludge control, improved fuel economy, enhance emission control system compatibility, seal compatibility and protection of engines operating on ethanol-containing fuels.

**GF-5 Energy Efficient Motor Oils**

ILSAC GF-5 lubricants improve passenger car performance from the spark plug to the tailpipe. These performance improvements are good news for lubricant marketers, auto manufacturers, consumers and the environment.

GF-5 Energy Efficient Motor Oil meets the current engine protection standard and fuel economy requirements of the International Lubricant Standardization and Approval Committee (ILSAC). The GF-5 specification is designed to provide improved high temperature deposit protection for pistons, more stringent sludge control and seal compatibility. API SN with Resource Conserving matches ILSAC GF-5 by combining improved fuel economy, turbocharger protection and emission control system compatibility.

**SN Plus Motor Oils**

API SN PLUS is a new Motor Oil specification developed for turbocharged engines that is being developed in response to automakers’ request for Motor Oils that protect against Low-Speed Pre-Ignition (LSPI). LSPI is an engine condition known to occur in turbocharged Gasoline Direct Injection (TGDI) engines that can be mitigated by changing the Motor Oil formulation.

**ACEA - European Spec Motor Oils**

ACEA European Oil Sequences for Service-fill Oils comprise 3 classes of sequences:
- Gasoline and Light Duty Diesel engines with after treatment devices (C1, C2, C3, C4, C5)
- Heavy Duty Diesel engines (E4, E6, E7, E9)
FULL SYNTHETIC

Full synthetic oil is used because of the high efficiency. Full synthetic oil offers superior protection for modern engines. The newer standards drive the need for low-viscosity oils that need to have a synthetic base, cutting friction and enhancing overall engine efficiency. Moreover, OEMs recommend synthetic for better protection under warranty and longer drain intervals.

Ultra Plus
EURO FORMULA FULL SYNTHETIC MOTOR OILS:

SYNTHETIC BLEND

Synthetic blend oil is a mix of conventional motor oils and synthetic base stocks. Because of the added synthetic base stock, engines get more performance and protection than by using a conventional oil alone. Synthetic blends offer protection for somewhat heavier loads and higher temperatures. They don’t evaporate as readily as conventional oils. They are a good choice for drivers who put heavy loads on the engine such as towing or off-roading. Semi-synthetics offer many of the same benefits of full synthetics, but at a fraction of the cost.

SN Plus: 10W40, 20W50
**MUTLI-GRADE**

Our low friction formula helps improve gas mileage for long engine life and helps protect against rust, corrosion, start-up wear, varnish build-up and eliminates the need for extra oil additives. It also protects against thermal breakdown which helps prevent stuck rings.

**MULTI-GRADE MOTOR OILS:**

- *SN Plus / GF5: 10W30*
- *SN Plus: 10W30, 10W40, 15W40, 20W50*

- Protects engines under all driving conditions
- Lowers friction and improves gas mileage
- Provides longer engine life
- Protects against rust, corrosion and varnish

**NON-DETERGENT**

Blended from selected premium base oils that are designed to provide good wear protection and resistance to oxidation, rust and foaming.

**NON-DETERGENT MOTOR OILS:**

- *SAE: 30, 40, 50*

- Protects engines under all driving conditions
- Lowers friction and improves gas mileage
- Provides longer engine life
- Protects against rust, corrosion and varnish

DIESEL

CK-4 DIESEL ENGINE OIL
API Service Category CK-4 describes oils for use in high-speed four-stroke cycle diesel engines designed to meet 2017 model year on-highway and Tier 4 non-road exhaust emission standards as well as for previous model year diesel engines. These oils are formulated for use in all applications with diesel fuels ranging in sulfur content up to 500 ppm (0.05% by weight). However, the use of these oils with greater than 15 ppm (0.0015% by weight) sulfur fuel may impact exhaust after treatment system durability and/or oil drain interval. These oils are especially effective at sustaining emission control system durability where particulate filters and other advanced after treatment systems are used. API CK-4 oils are designed to provide enhanced protection against oil oxidation, viscosity loss due to shear, and oil aeration as well as protection against catalyst poisoning, particulate filter blocking, engine wear, piston deposits, degradation of low and high-temperature properties and soot-related viscosity increase. API CK-4 oils exceed the performance criteria of API CJ-4, CI-4 with CI-4 PLUS, CI-4 and CH-4 and can effectively lubricate engines calling for those API Service Categories. When using CK-4 oil with higher than 15 ppm sulfur fuel, consult the engine manufacturer for service interval recommendations.

AVAILABLE IN:
5W30, 10W30, 15W40

CJ-4 15W40 DIESEL ENGINE OIL
Premium grade diesel engine oil that provides excellent protection for newer, high performance engines that are used in the toughest on-road and off-road applications. Shown to be versatile as well as able to meet the grueling demands of today’s low emission diesel engines, as well as the older models, which are using both low and high sulfur fuels.

SAE 15W40 -Specs: Caterpillar ECF-1-A, ECF-2, ECF-3; MACK EON, EO-M Premium Plus, EO-O Premium Plus; CUMMINS CES 20077/20078/20081; Detroit Diesel DDC93K215/DDC93K218; DAIMLER CHRYSLER MB228.5 MB228.1 MB228; NAVISTAR INTERNATIONAL; FORD M2C171; VOLVO VDS-4,VDS-3, VDS-2

- Performs well in low emission diesel engines, which increases the demands on engine lubricants
- Excellent soot handling capabilities
- Exemplary thermal stability and oxidation control
- Contains properties that provide anti-wear and anti-scuff
- Contains extended TBN reserves, which provide improved acid neutralization and corrosion protection
- Maximizes oil flow to the critical bearing surfaces during start-up
- Has stay-in-grade sheer stability
- Extended drain capabilities - excellent water tolerance
- Meets manufacturer’s latest warranty requirements of CJ-4 and SN
LUBRICANTS & MOTOR OILS

MULTI-FLEET

CI-4/SL MULTI-FLEET PREMIUM ENGINE OIL
CI-4/SL multi-fleet engine oils are premium grade engine oils that provide excellent protection for newer, high performance engines. They are designed for use in mixed fuel fleets.

For diesel applications requiring API CI-4 or older specifications as well as gasoline applications requiring API SL or older specifications.

AVAILABLE IN:
5W30, 10W30, 10W40, 15W40, 20W50 CI-4/SL

- Performs well in low emission diesel engines which increase the demands on engine lubricants
- Delivers the best performance in these late model engines, as well as older engines
- Excellent soot handling capabilities
- Exemplary thermal stability and oxidation control
- Contains properties which provide anti-wear and anti-scuff
- Meets the performance requirements of API CI-4 and SL

CI-4/SL MULTI-FLEET MOTOR OIL
Provides high quality engine protection under all driving conditions and is specifically formulated to provide extra protection against the harmful effects of city driving.

Our low friction formula helps improve gas mileage, extend engine life and protect against rust, corrosion, start-up wear and varnish build-up. It also protects against thermal breakdown which helps prevent stuck rings.

AVAILABLE IN:
SAE 30, 40, 50, 10W40, 15W40, 20W50 and 25W60 CH4/SL

- Protects engines under all driving conditions
- Lowers friction and improves gas mileage
- Provides longer engine life
- Protects against rust, corrosion and varnish
- Resists thermal breakdown

GL-5 FULL SYNTHETIC AND SYNTHETIC BLEND GEAR OILS
A premium quality gear oil for transmissions and final drives. Meets the toughest industry specifications for automotive extreme pressures (EP) gear lubricants including limited slip differentials. Designed for extreme pressure, offset spiral bevel and hypoid gear sets (ring and pinion gears) in heavy-duty trucks, farm, logging and construction machinery. Suitable for extended drain intervals. Available in: 75W90 and 75W140 in Full Synthetic;  80W90 and 80W140 in Synthetic Blend
• Synthetic base stocks maximize oxidation resistance
• Greater film strength at higher operating temperatures
• Reduced wear at start-up and ease of start-up even in arctic conditions
• Extreme pressure additives prevent gear scuffing and scoring
• Prevents formation of rust and sludge throughout the system
• Fortified to prevent chatter in limited slip synchromesh drive trains
• Excellent resistance to foaming
• Extended drain intervals versus conventional products

GL-5 GEAR OILS
A premium quality multi-purpose gear lubricant which provides superior performance that is obtained through the use of quality base oils and a select extreme pressure additive system. These additives impart anti-weld, anti-scuff and anti-wear properties that are necessary in heavy-duty service gear lubricants. GL-5 Gear Oils provide excellent protection under the most severe conditions encountered in commercial transmissions, axles and final drives. GL-5 Gear Oils are designed to be used in limited slip differentials.

AVAILABLE IN: 80W90 and 85W140
• For use in limited slip differentials
• Excellent for heavy equipment applications with higher performance demands on the drive train lubricants
• Exceptional reliability in today’s drive train applications as well as in the older models
• Provides high thermal stability as well as oxidation resistance
• Protects against low speed high torque wear
• Excellent fluidity in low temperatures which reduces wear during start-up
• Improved lubrication and extended seal life due to good foam control

GL-1 GEAR OILS
Manufactured with high quality base stocks to provide outstanding oxidation stability for long service life. This oil is inhibited against foaming and does not contribute to corrosion or wear of yellow metals, such as brass or bronze. GL-1 Gear Oil meets API designation GL-1.

AVAILABLE IN: SAE 90, 140 and 250
• Long service life
• Non-foaming
• Non-corrosive

**2-CYCLE ENGINE OIL**

Designed for small engines to provide excellent engine protection in both variable ratio injection systems and fuel/oil pre-mix applications. It is pre-diluted to provide easy mixing. Formulated to ensure fluidity and miscibility at low temperatures. 2-Cycle Engine Oil is specifically designed for use in newer high performance air-cooled engines, but can be used in any air-cooled engine where low ash oils are recommended.

Our premium formulation is fully compatible with low octane, oxygenated/gasoline fuels. It will provide outstanding anti-scuff, anti-wear, rust and corrosion protection and it burns cleanly and helps keep port clear for maximum output. It also protects bail and needle bearings during high RPM use.  Available in: 20W50- API SL/CI-4

**TC-W3 2-CYCLE ENGINE OIL**

Designed for small engines to provide excellent engine protection in both variable ratio injection systems and fuel/oil pre-mix applications. It is pre-diluted to provide easy mixing. **FULL SYNTHETIC MOTORCYCLE OIL**

ABRO Full Synthetic Motorcycle Oil is specially designed to protect motorcycle engines. It is formulated with full synthetic base stock and a premium additive package chosen for exceptional wear protection, sludge and varnish resistance and thermal stability.

- Reduces heat, friction, and wear
- Gives excellent protection for transmissions and wet clutches
- Helps reduce foaming and air-entrainment in high speed engines
- Provides excellent protection for air cooled engines
- Multi-grade formula allows easier cold starts while maintaining high temperature film strength
- Outstanding protection against thermal and viscosity breakdown
- Protects against piston/cylinder scuffing

Can be used in all 4-stroke motorcycle engines, including racing, high performance, street and off road motorcycles. Available in: 20W50- API SL/CF, JASO MA2

**SYNTHETIC BLEND MOTORCYCLE OIL**

ABRO Synthetic Blend Motorcycle Oil can be used in all 4-stroke motorcycle engines, including racing, high performance, street and off road motorcycles. It can also be used in motorcycle transmissions when API SN, SM, SL, SJ, or SG motor oil is required. Available in: 10W40 SN/JASO MG-API SN,SM,SLSJ JASO MB

**PREMIUM MOTORCYCLE OIL**

ABRO Premium Motorcycle Oil is a formulation specially designed to protect motorcycle engines and meet the lubricating performance requirements for four-stroke cycle gasoline engines. It is formulated with a premium additive package chosen for excellent control for deposit, exceptional wear protection, sludge and varnish resistance and thermal stability.

**AVAILABLE IN:**

10W40 –API SN,SM,SL,SJ JASO MB
5W30 –API SN,SM,SL,SJ JASO MA2

**4-CYCLE MOTORCYCLE OIL**

ABRO 4-Cycle Motorcycle Oil is specially designed to protect motorcycle engines. It is formulated with a premium additive package chosen for exceptional wear protection, sludge and varnish resistance and thermal stability. Available in: 20W50 SL

GLOBAL ATF
A premium fluid designed for automatic transmissions of all North American, European and Asia-Pacific-made vehicles. Global ATF provides exceptional oxidation, wear, frictional stability and anti-shudder properties required in today’s high performance transmissions. It is also designed to deliver premium performance in older transmissions. Available in Red and Amber color.

CVT TRANSMISSION FLUID
CVT Fluid is a full synthetic automatic transmission fluid specifically formulated for today’s technologically sophisticated variable transmissions. This product eliminates the need to stock multiple, limited OEM brands. CVT Fluid has equal, and in most cases, better performance than the most common North American CVT Fluids being supplied by leading OEMs. CVT Fluid provides engineered anti-shudder performance for smooth transfer of power, exceptional anti-oxidation and anti-wear protection in highly sophisticated variable transmissions.

• Excellent low temperature fluidity • Provides excellent anti-wear, anti-corrosion, anti-foam and oxidation resistance • Possesses excellent metal frictional characteristics • Excellent Shear Stability • Provides foaming resistance – contains an anti-foaming agent • Dyed red for easy identification

DCT - DUAL CLUTCH TRANSMISSION FLUID
Specifically formulated for use in the DPS6 power shift twin dry-clutch transmission
Manufactured with synthetic base oils and performance additives providing improved shifting at all ambient temperatures
Use only in transmissions requiring a fluid meeting WSS-M2C200-D2
Also used to operate the transmission’s shift mechanisms
Protects against wear and corrosion, while low viscosity improves fuel economy

MULTI-PURPOSE ATF
Created for electronically controlled transmissions, this product may be used in GM automatic transmission units that require the use of Dexron® IIH, Dexron® IIIG, Dexron® III, and Dexron® III fluids and is qualified Ford Mercon® ATF. Further, it meets the performance requirements for Allison Transmission Division C4, and major hydraulic pump manufacturers’ requirements for anti-wear hydraulic fluids. Multi-Purpose ATF provides excellent friction stability, oxidation, anti-wear properties and low-temperature fluidity desired for most automatic transmissions.

AW HYDRAULIC OILS
Hydraulic Oils are premium quality anti-wear hydraulic fluids designed to provide optimal protection in high pressure applications. Formulated to provide rust protection as well as foam inhibition. AW Hydraulic Oils have excellent oxidation resistance and provide superior anti-wear protection. AW Hydraulic Oils have a dielectric strength above 35kV and are non-conductive.

• Specifically designed to maximize protection to hydraulic pump and their parts • Formulated with highly refined, high viscosity base stocks • Provide excellent rust protection • Anti-wear additives create a protective film on metal surfaces • Helps minimize metal to metal contact that is most severe in vane and gear pumps

STOU 10W30 TRACTOR FLUID
STOU 10w30 Tractor Fluid is multi-functional oil specially formulated with premium quality base stocks, proper viscosity index improvers, pour point depressants and a top-grade additive for use in tractors and equipment utilizing STOU fluids for the engine oil. STOU 10w30 Tractor Fluid can be used for the crankcase of diesel and four stroke gasoline engines, hydraulic systems, transmissions, final drives, PTO clutch, wet brakes, hydrostatics and power steering. STOU 10w30 Tractor Fluid has a wide range of applications in engines, transmissions and hydraulic systems of modern tractors.

• Provides outstanding wear and friction control
• Offers powerful dispersing and detergency
MEETS PERFORMANCE CAPABILITIES: API CE, CF, CF-4, CG-4, SF; API GL-4; ACEA E2; ACEA E3; JOHN DEERE, J27; MASSEY FERGUSON CMS 1145, 1144, 1139; ALLISON C4; FORD M2C159B; ZF TE ML 06A, 06B, 06C, 06D, 07B; CATERPILLAR TO-2; MB 227.1, MB 228.1, MB 228.3; MAN 271; MIL-L-2104D
Related Applications Requiring a STOU Fluid (Super Tractor Oil Fluid)

TRACTOR TRANSMISSION HYDRAULIC FLUIDS
Formulated specially for use in transmissions, final drives, wet brakes and hydraulic systems of tractors and other equipment that employ a common fluid reservoir.
Available In: XL Tractor Hydraulic Fluid, EL Tractor Hydraulic Fluid

• Performs many functions such as lubrication of the transmission and final drive
• Serves as hydraulic fluid for the operation of power steering unit and brakes

TO-4 TORQUE FLUIDS
TO-4 Torque Fluids are high performance transmission and drive-train lubricants designed to meet the requirements of Caterpillar’s TO-4 specifications. Engineered to optimize the performance of powershift transmissions, gearboxes and final drives.
TO-4 Torque Fluids contain an advanced additive system to deliver the precise performance parameters needed to maximize the productivity of construction, quarrying and mining equipment operating in severe conditions.

• Designed for heavy-duty construction equipment power shift transmissions
• Special additives protect metal surfaces against scuffing and wear
• Frictional controls stop slippage and assure silent and efficient action
• Resists oxidation at elevated operating temperatures • Defends against rust and corrosion of highly refined precision parts • Base oils and additives are carefully chosen for compatibility with clutch face and seal materials

NEW PRODUCT

TYPE A
ATF Type A is a quality economical fluid. It is formulated from select base oils with a special additive to suppress foam formation. It contains red dye as a leak detector. Type A Automatic Transmission Fluid provides straight mineral oil lubrication and can be used when a lubricant of this type is recommended.
